

MOHAIMMEN BAJWA

Full-Stack Web Developer · Richmond Hill, ON · (647) 969-2300
mohaimmenbajwa2002@gmail.com

Full-stack web developer with 5+ years of production experience shipping client websites and a current focus on modern Vue/Nuxt + Postgres applications. Designed and built an end-to-end SaaS platform for a multi-location driving school covering authentication, payments, scheduling, document ingestion, and a Capacitor-based Android tracker — all on a single Nuxt 4 codebase backed by Supabase Postgres with row-level security.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL (Postgres), PHP, Python, HTML5, CSS3

Backend: Nitro server routes, Node.js, REST APIs, Server middleware, Cron jobs

Auth & Security: Supabase Auth, CSRF, CSP w/ nonce + strict-dynamic, rate-limiting, reCAPTCHA v3

Tooling: Git, Supabase CLI, ESLint, Playwright, pnpm/npm, VS Code, Claude Code

Frontend: Vue 3, Nuxt 4, Tailwind CSS v4, Nuxt UI, Vite, PWA (Workbox)

Database: Supabase / Postgres, Row-Level Security, JWT custom claims, SQL migrations

Integrations: Moneris Hosted Checkout, Resend, IMAP (imapflow), Leaflet, Capacitor 6

WordPress: Elementor, Divi, WP Rocket, Wordfence, UpdraftPlus, All-in-One SEO

FEATURED PROJECT — DRIVING HEADQUARTERS PLATFORM (2024 — PRESENT)

Stack: Nuxt 4 · Vue 3 · TypeScript · Supabase (Postgres + Auth + Storage + Realtime) · Tailwind v4 · Nitro · Moneris · Resend · Capacitor 6 · Leaflet

Single-codebase web + mobile platform serving a public marketing site, four authenticated dashboards (student, parent, instructor, admin), a payments + financial-ledger system, an email-driven document-ingest pipeline, and a live GPS lesson tracker.

- Designed a **role-based authorization model** enforced in three layers — client route middleware, server `requireAuth/requireRole` guards, and Postgres RLS policies driven by a JWT custom-claims hook.
- Built a complete **payments pipeline** with Moneris Hosted Checkout: server-to-server verify, immutable transaction audit trigger, payment-plan modelling, and an e-Transfer claim/reconciliation workflow.
- Engineered a **document-ingest pipeline** that auto-routes forwarded emails (BDE receipts, MTO certificates, driver licences, payment receipts) to the right student via per-document-kind extractors, content-fingerprint dedup, and a fuzzy student matcher.
- Wrote a **live trip tracker** using `@capacitor-community/background-geolocation` as an Android foreground service with offline GPS buffering and Supabase Realtime playback on a Leaflet map.
- Hardened the public surface with **nuxt-security** CSP (per-request nonce, strict-dynamic), custom CSRF middleware, IP+session rate limiting, reCAPTCHA v3, honeypot, and dwell-time bot defence.
- Authored 60+ versioned SQL migrations and adopted the **Supabase CLI** migrations workflow with a sandboxed local Postgres for safe schema changes against a live prod database.
- Set up a **Playwright-based QA harness** that runs a full sandboxed regression pass (auth flows, role gating, RLS/GRANT checks, payment + registration APIs) before any deploy.

EXPERIENCE

Web Developer — Driving Headquarters / *Sept 2019 — Present*

- Sole developer of drivingheadquarters.ca — built and continue to maintain the marketing site, payments, content, and full custom Nuxt + Supabase platform above.
- Originally delivered the site on WordPress with Elementor, then migrated to a modern Nuxt 4 / Supabase architecture as the business grew into a real LMS.
- Own performance, SEO, security headers, backups, and uptime.

Web Developer — Tamil Heritage Month / *Dec 2022 — Present*

- Built tamilheritagemonth.com end-to-end in Divi theme builder.
- Migrated the domain to a new hosting provider, including DNS/nameserver cutover and post-transfer troubleshooting.

Web Developer — LSAYork / *Nov 2022 — Present*

- Built lsayork.ga on a zero-budget brief — sourced free hosting + domain and delivered a fully working site.

Web Development Intern — 7th Pixel / *Jun 2019 — Aug 2019*

- Contributed to client website builds using HTML and PHP; assisted with MySQL data management tasks.

EDUCATION

B.Sc. Biotechnology — York University, Toronto / *2021 — Present*

High School Diploma — Bayview Secondary School, Richmond Hill, ON / *2016 — 2020*

ADDITIONAL

- Speak four languages including English.
- Comfortable working with AI coding assistants (Claude Code) and modern AI-augmented development workflows.
